

TALKS@CMS – WEDNESDAY 4 NOVEMBER 2009

PRESENTATION BY AUSTECH EXTERNAL BUILDING PRODUCTS

Q1. FOAMULAR is an extruded or expanded polystyrene insulation?

Extruded

Q2. Extruded polystyrene has higher R Values than expanded polystyrene – True or False?

True

Q3. Moisture absorption decreases thermal performance – True or False?

True

Q4. FOAMULAR is guaranteed to maintain a minimum of 90% thermal retention for how long?

20 years

Q5. Name one benefit FOAMULAR has over expanded polystyrene?

Higher compressive strength, higher R values for thickness, lower moisture absorption

Q6. What does PRMA stand for?

Protected Roof Membrane Assembly

Q7. FOAMULAR is available in compressive strengths to meet various load bearing requirements – True or False?

True

Q8. External insulation systems eliminate.....Bridging?

Thermal
